

PANIMAYA PREETHI

MBA Candidate — Aspiring Data & Business Analytics Professional

Chennai, India | +91 7904755495 | panimayapreethi@gmail.com | linkedin.com/in/Panimaya-preethi

PROFESSIONAL SUMMARY

MBA candidate with hands-on experience building data pipelines and dashboards using SQL, Python, and Power BI/Tableau including a churn model (78.7% accuracy), statistical analysis identifying key satisfaction drivers in e-commerce data, and a retail sales dashboard. Skilled at turning raw data into clear insights. Seeking a Business Analytics internship to apply these skills to real business problems.

EDUCATION

Master of Business Administration (MBA & PGPM)

2025 - 2027

ISSM Business School, Chennai

Bachelor of Business Administration (BBA)

2022 - 2025

PSG College of Arts and Science, Coimbatore

TECHNICAL SKILLS

Programming & Database: SQL (MySQL, Joins, Aggregations), Python (Pandas, NumPy, Matplotlib)

Visualization & BI: Power BI (DAX, Power Query), Tableau, Advanced Excel (Pivot Tables, XLOOKUP)

Data Analysis: Data Cleaning, Exploratory Data Analysis(EDA), KPI Analysis, Data Storytelling

Tools: Git, GitHub, Jupyter Notebook, VS Code

PROJECTS & EXPERIENCE

Customer Satisfaction Analysis in Brazilian E-Commerce (Olist) | [\[GitHub link\]](#)

June 2026

Python | Pandas | SQL | Tableau | Statistics

Merged and cleaned 7 relational datasets (~99K orders) using Python/Pandas; ran Pearson correlation testing to show delivery delay significantly predicts review score ($r = -0.27$, $p < 0.001$) 1-star orders arrived ~9 days later on average than 5-star orders. Identified underperforming product categories (lowest-rated: 2.5/5 vs. platform mean 4.09/5) and a 0.6-point satisfaction gap between top and bottom states; built a Tableau dashboard to surface these findings.

Customer Churn Prediction & Retention Analytics | [\[Live App\]](#) · [\[GitHub\]](#)

May 2026

Python | SQL | Scikit-learn | Streamlit

Built a Logistic Regression churn model on 7K+ telecom customer records, achieving 78.7% accuracy; identified the top 20% highest-risk customers by predicted churn probability as the priority segment for retention outreach. Modelled the financial impact of a targeted retention campaign vs. blanket discounting, projecting a net profit of \$22,380 against \$5,620 campaign cost; deployed the analysis as an interactive Streamlit app.

Global Retail Sales & Profit Analytics Dashboard | [\[GitHub link\]](#)

May 2026

SQL | Power BI | DAX

Built a MySQL data model with reusable views and window-function queries (RANK, running totals) to analyse \$1.38M in sales across 7 product categories. Designed a Power BI dashboard surfacing a 49.08% profit margin and top revenue-driving products/customers across sales, profit, and quantity KPIs.

Business Analyst Internship | InterNova EduTech

June 2026

Conducted competitor and customer review analysis, synthesizing findings into a structured insights report to support business strategy decisions. Researched target companies and market opportunities to support business development planning. Collaborated with cross-functional teams to present findings and recommend business improvements.
